EDUCATION BACKGROUND

Lingnan Normal University

Bachelor's degree in Data Science and Big Data Technology 2021.09 – 2025.07

- **Cumulative GPA:** 3.2/5.0

WORK EXPERIENCE

Baichenyuan (Beijing) Technology Co., Ltd., Guangzhou Branch Test Engineer 2026.05 – Present

- Support hospital go-lives and smart nursing delivery at Guizhou Provincial Hospital of Traditional Chinese Medicine and Shandong Provincial Hospital; reproduce production issues and verify fixes.
- Test the **new nursing management and nursing documentation systems** through routine business testing and release regression. Design test points and cases for workflows, configuration, and document management; configure and refine testing Skills with Codex Agent, standardize defect reproduction steps, screenshot evidence, and output templates, and review results.
- Contribute to an **AI-driven UI test automation framework using Python + Midscene**, developing and maintaining business regression scripts. Use Python + Pytest for API automation to support release regression.

Xiwei Technology (Guangzhou) Co., Ltd. Test Engineer 2025.07 – 2026.04

- **Independently own the functional testing lifecycle** for Xiwitab weekly releases: participate in requirements reviews, design test plans and data, and validate statistical chart data and rendering. Follow up fixes, run release regression, write release notes, and initiate hotfixes when needed.
- Test **QMS business iterations and on-premises delivery** across Plan, Library, and the notification module. Design Apifox API cases around order operations and asynchronous queries, and run basic concurrency checks and delivery regression.
- Build a Python + Pytest + Playwright + Allure **UI automation framework using the Page Object pattern**; develop and maintain module regression scripts for weekly releases and regression.

Xinghe Zhilian Automotive Technology Co., Ltd. Automation Test Engineer (Intern) 2024.08 – 2025.05

- Handle **test automation and release regression** for AY3, AY5, and AY5-T. Develop and maintain infotainment, voice, and driver-assistance test scripts using Python, Pytest, uiautomator2, ADB, CAN, and ZCANPRO, and perform routine embedded-system validation and bench stress testing.
- Run release regression through Jenkins, analyze test reports, and follow defects through resolution to support **on-schedule releases for all three models** and stable delivery during production.

PROJECT EXPERIENCE

RainSoul Writing and Reference Manager Personal project

Requirements analysis, Functional architecture, UI design, Codex Agent, Git; Electron, React, TypeScript, SQLite

- Plan manuscript editing, plot management, and AI-assisted features for long-form writing. Design a shared reference library and project-specific libraries to support offline writing and reference reuse across projects.
- Handle requirements breakdown, UI decisions, and acceptance criteria; use Codex to drive feature development, issue fixes, and Git version iterations. Define workflows for previewing and approving AI suggestions, applying changes, and restoring previous versions.
- The app encrypts AI service keys using secure system storage, keeps them separate from writing data, and excludes them from backups. SHA-256 checks backup integrity to support credential protection and data recovery.

SKILLS

- **Language Skills:** English proficiency at CET-4 level
- **Professional Skills:** Codex Agent, Skill configuration and workflow design, Python, SQL, Linux, Apifox, Pytest, Midscene, Playwright, Git
