EDUCATION BACKGROUND

Lingnan Normal University

Bachelor's degree in Data Science and Big Data Technology 2021.09 – 2025.07

- **Cumulative GPA:** 3.2/5

WORK EXPERIENCE

Baichenyuan (Beijing) Technology Co., Ltd., Guangzhou Branch Test Engineer 2026.05 – Present

- Support hospital go-lives and smart nursing delivery at Guizhou Provincial Hospital of Traditional Chinese Medicine and Shandong Provincial Hospital; reproduce production issues and verify fixes.
- Test the **new nursing management and nursing documentation systems** and run release regression. Configure and refine testing Skills with Codex Agent to assist test-case writing and standardize defect evidence and output templates. Contribute to an AI-driven UI test automation framework using Python + Midscene, develop business regression scripts, and use Python + Pytest for API automation and pre-release regression testing.
- Contributed to test platform development, implementing AI orchestration of open-source security testing tools, test-case setup and teardown, and scheduled regression scripts.

Xiwei Technology (Guangzhou) Co., Ltd. Test Engineer 2025.07 – 2026.04

- Independently own the **full functional testing lifecycle** for weekly releases of the Xiwitab statistical analysis platform. Participate in requirements reviews, prepare test plans and data, and validate statistical results and chart displays. Follow up defect fixes and release regression, write release notes, and initiate hotfixes when needed.
- Test **QMS business iterations and on-premises delivery** across Plan, Library, and the notification module. Design Apifox API cases around order operations and asynchronous queries, and run basic concurrency checks and delivery regression.
- Build a **UI automation framework** using Python + Pytest + Playwright + Allure and the Page Object pattern; develop and maintain module regression scripts to support functional validation for weekly releases and release regression.

Xinghe Zhilian Automotive Technology Co., Ltd. Automation Test Engineer (Intern) 2024.08 – 2025.05

- Handle **test automation and release regression** for AY3, AY5, and AY5-T. Develop and maintain infotainment, voice, and driver-assistance test scripts based on Python + Pytest, using uiautomator2, ADB, CAN, and ZCANPRO; perform routine embedded-system validation and bench stress testing.
- Run regression through Jenkins, analyze test reports, and follow up defect fixes and retesting to support **on-schedule releases and stable production delivery** for all three models.

PROJECT EXPERIENCE

RainSoul Writing and Reference Manager Personal project

Requirements analysis, Functional architecture, UI design, Codex Agent, Git; Electron, React, TypeScript, SQLite

- Address the challenge of limited writing experience and coordinating story settings and plot. Use AI-assisted creation to lower the barrier to writing, supporting ongoing storytelling, identification of writing issues, and content consistency.
- Handle requirements, functional architecture, and UI design. Design an AI writing workflow grounded in project materials, connecting reference organization, assisted writing, and feedback; use Codex Agent to advance development and follow up on interaction acceptance and issue fixes.
- Use SQLite to store works, chapters, and reference materials, supporting offline writing and reuse across works; protect AI service keys using secure system storage and verify backup integrity with SHA-256.

SKILLS

- **Language Skills:** CET-4
- **Professional Skills:** Codex Agent, Skills, Python, SQL, Linux, Apifox, Pytest, Midscene, Playwright, Git, Hadoop
